Client Testimony

NAYMOTE – Partners for Democratic Development has worked with ACIPP Consulting for the past two-year. Through these years, we have hired and consulted ACIPP Consulting to organise, analyse, develop and write professional documents amongst which were the analysis and development of a survey titled: **“Public Perception on Access to Legislature”** and the development of legislative training handbook titled: **“Understanding the Workings of the Liberia Legislature – A Resource and Training Guide”**. NAYMOTE was highly pleased with the products.

S. Aaron Weah-Weah, III
Programme Director, NAYMOTE, Liberia

We do not only work only with NGOs. If you are a business entity – whether profit making or not-for-profit, we want to work with you too!

We also provide special support to youth-run & youth-focused groups, women groups and disability - supportive groups.

Creating | Sharing | Shedding | Knowledge

*“On my way to the first ACIPP training on **Report Writing** my expectations were clear, another classroom lectures!*

Interestingly learning was practical and contextual to our everyday work and I also had the space to share and learn from other participants as well as facilitators.

*What struck me most was the originality of the **Social-Media-4-Development** sessions. These were very essential to us because it clearly gave us the start in how to profile our self and our work/organisation. This is very important especially as we are faced with the reality of fundraising competitions. As learning is a process, giving another opportunity again I will grab it!!!” – Zynab Binta Kamara Senesie, Action Aid International, Sierra Leone, 2013*

Our Mission/Vision

Mission:

Creating, Sharing, and Shedding Knowledge for West Africa.

Vision:

We seek to be the Centre of Excellence in the Provision of Training, Technical Support and Capacity Building Services for all kinds of actors – small, medium and large not-for-profit and for-profit organisations across West Africa .

Our Approach

Our approach to training is participant heavy and we have grown to develop trainings and strategies that get participants involved through group work and other exercises.
